

Haysville Educator Assessment Tool

The purpose of the USD 261 evaluation process is to provide for continual improvement of instruction and student learning. All reasonable supports will be exhausted before a licensed employee is determined to be ineffective and released. The educator evaluation process will be consistent with procedures outlined in Kansas State Law.

Twenty-five measurement areas have been grouped into four indicators. Each measurement area will receive one of the following ratings:

- 4 = Highly Effective – Evidence indicates consistent, highly effective teaching skills
 - 3 = Effective – Evidence indicates competence in the teaching profession
 - 2 = Developing – Evidence indicates foundational knowledge and/or inconsistent application
 - 1 = Ineffective – Evidence does not support a basic standard of performance
- “Effective” and “Developing” ratings may have written statements or documentation
 “Highly Effective” and “Ineffective” ratings must have written statements or documentation

Ratings in the areas for measurement will be averaged together to determine the ratings in the four indicators. The four indicators are: 1) instructional practice, 2) professional responsibility, 3) student learning, and 4) content knowledge. The four indicator ratings will be averaged together to determine the summative Instructional Practice rating.

The evaluated will share evidence of student growth measures with the evaluator. Student growth measures will come from at least two of three areas: State Assessments (where required must be one measure included), State Approved Vendor Assessments, and Locally Created Assessments. Each of the Student Growth Measures will receive a rating of 4, 3, 2, or 1 as described above. The student growth measures will be averaged together to determine the Student Growth Measures summary rating.

The Instructional Practice summary rating and the Student Growth Measures summary rating will be averaged together to determine the Evaluation Summary Rating.
