

About Us

We encourage all USD 261 staff to take advantage of the learning opportunities available at The Dr. John Burke Learning Center. Guests from other districts are always welcome to attend any of our workshops. We offer a full array of classes that are interactive, differentiated, job embedded, sustained and research based. Enroll in a workshop today!

Hands On Science Experiments for Elementary Teachers

**Wednesday, September
20, 2023**

150 Stewart Ave
Haysville, KS 67060

USD261 does not discriminate on the basis of race, color, national origin, age, sex, disability, or military status, in admission or access to, or treatment or employment in its programs and activities. Any person having inquiries concerning Haysville Public School's compliance with the regulations may contact the Assistant Superintendent for Personnel, Gillian Macias, 1745 W. Grand, Haysville, KS 67060, 316-554-2200.

Workshop Description

If you're interested in receiving 40-50 quick, easy setup science experiments for your classroom, this is the class for you! Take these ideas back to your students and colleagues! You will know how to set up science experiments your students will love! Enjoy doing science with humor, too.

If you like to sit and nearly fall asleep during a session, this is NOT the class for you. You will be actively participating, independently or with partners, putting experiments together and demonstrating the experiments to class participants. Steve will demonstrate experiments, as well. If you think science can't be fun... think again!!!

The Presenter

Steve Murphy has his master's degree in Science Education and graduate hours beyond his master's. His 43+ years in education include teaching College Bound Biology to high school seniors; Biology; General Science; Middle School Life, Earth, and Physical Science. He has presented science experiments to Future Teachers at Kansas State University and has been a presenter at Kansas Association of Teachers of Science (KATS) Camp numerous times. He's a recipient of Who's Who Among American Science Teachers twice. Steve's love is middle school science; however, he's seen elementary teachers struggle to produce meaningful science experiments that don't take days to set up. After retiring from Haysville schools, he traveled for a year, then accepted a seventh-grade science position on a Native Reservation in Poplar, MT, where he taught for two years before retiring again. Steve loves to stay connected with education!

Workshop Information

- **Date & Time:**

Wednesday, September 20, 2023
8:30 am - 3:30 pm

- **Location:**

Dr. John Burke Learning Center
150 Stewart
Haysville, KS 67060
